

Paramedic interactions with out-of-hospital childbirth

This study is exploring the experience and training of paramedics, ambulance officers and volunteer ambulance officers in Australia and New Zealand, regarding births and obstetric emergencies which occur at an unplanned location (out-of-hospital births).

If you work in Australia or New Zealand as a paramedic / ambulance officer / volunteer ambulance officer and are over 18 years of age, then we need your input! (If you retired ≤ 5 years ago, you may also participate!)

If you are interested in participating in this research project the link to the survey is provided below. The survey will take 10-15 minutes.
